

INDUSTRIAL WOOD FILLER AND WOOD REPAIR PASTE

P-TEC™ 8400

We are pleased to introduce our P-TEC™ 8400 wood repair paste, a cutting-edge solution designed to revolutionize the furniture manufacturing industry. This high-performance repair paste is tailored to address the unique challenges faced by furniture manufacturers, offering a wide range of benefits that can enhance your production processes and product quality.

WOOD FILLER: SAFETY, VERSATILITY, AND QUALITY

Our two-component polyurethane wood filler is a game-changer for filling cracks, knots, and defects in "Live Edge" boards, wood panels, furniture, cabinets, and much more. It prioritizes safety and food safety standards, ensuring that your projects are both visually appealing and safe to use.

Its versatility, ease of application, and durability make it a must-have for professionals and woodworking companies. Say goodbye to wood imperfections and hello to flawlessly finished woodwork with our revolutionary wood filler.
